Rachit Gupta

React Native Developer

+91-9009634404 grachit736@gmail.com LinkedIn Github Portfolio

Objective

React Native Developer specialized in building high-performance, scalable mobile applications. Specialized in managing complex state and server data using **Zustand** and **TanStack Query**. Proven track record in optimizing UI responsiveness by minimizing re-renders through advanced **memoization** (useMemo, useCallback) and implementing efficient caching strategies. Currently looking for new job or internship opportunities as a Software Engineer or React Native Developer

Experience

Application Developer Intern Link 4/2025 – 10/2025

- Architected a mobile application from using React Native and Zustand, implementing a centralized state management strategy that improved data flow consistency and **reduced re-renders by 65%.**
- **Optimized application performance** by implementing **lazy loading** and **bundle size reduction** techniques, resulting in a **20% faster** initial load time and smoother UI responsiveness across low-end devices.

Education

Gyan Ganga College of Technology , Jabalpur (MP) India **10/2022 – 5/2026**
B.Tech Computer Science Engineering 7.46 / 10

Skills

Frameworks/Libraries : React Native , React Js , Zustand , Redux , Tanstack Query

Languages : Typescript, Javascript , Java

Tools : Git , Github , VS code , Postman , Android Studio

Projects

Grocery App (React Native, Node.js, MongoDB) github video demo 11/2025 – 1/2026

- Implemented high-performance UX features including infinite scroll pagination, category search, live location tracking, and AI customer support.
- Integrated secure OTP authentication, wallet system, Razorpay payments (Online + Wallet + COD), and persistent cart management using local storage.
- **Secured user sessions** by developing a **Refresh Token Rotation** system with MongoDB-based **nonce validation**, reducing the window for unauthorized access by **40%**
- Designed production-ready backend with modular REST APIs and deployed services on cloud infrastructure for scalable performance.

TaskPlanet – Social Media App (MERN Stack) website documentation 1/2026 – 2/2026

- **Developed a full-stack social media platform** with a secure login system that handles **1000+ users**; implemented **Access & Refresh Tokens** to protect user data and maintain 100% session security.
- **Engineered a high-performance social feed** using **infinite-scroll pagination**, which reduced page load time by **40%** and improved the user experience for long comment threads.
- **Optimized media handling** by building an image upload and content management system, allowing users to manage posts with **zero lag** and ensuring **100% secure deletion** of data from the database.
- Deployed frontend on Vercel and backend on Render with scalable REST API architecture.
