

RACHIT GUPTA

Full Stack Engineer — Next.js · TypeScript · MongoDB · React Native

+91-9009634404 | grachit736@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-Stack Engineer (2026 Batch) specializing in Next.js, TypeScript, and MongoDB, with hands-on internship experience. Proven ability to build and deploy live web apps on Vercel using Next.js 16 App Router and manage data flow using MongoDB Atlas & Mongoose. Experienced in architecting full-stack mobile apps (React Native) from scratch using clean, layered backend code (Controller-Service-Repository pattern). Ready to collaborate directly with founders to ship scalable features, optimize REST APIs, and implement AI integrations from day one.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: Next.js, React.js, React Native (CLI and Expo), Zustand, Redux, Responsive UI Design

Backend: Node.js, Express.js, REST APIs, Microservices, Layered Architecture

Database: MongoDB, MongoDB Atlas, Mongoose

Tools & Integrations: Git, GitHub, JWT Auth, WebRTC, Firebase, Postman

PROJECTS

Movie Finder — Movie Discovery Web App [Live Link](#) | [GitHub](#)

Next.js · TypeScript · TMDB API

- Built and deployed a full-stack movie discovery app using Next.js 16 App Router and TypeScript, consuming the TMDB REST API for trending, search, and detailed movie data.
- Implemented infinite-scroll pagination, in-app trailer playback, and an add-to-favorites feature with persistent client-side state, across a fully responsive UI.
- Deployed to production on Vercel with optimized API request handling and image loading for fast, reliable page loads.

Grocery Delivery Application | [GitHub](#)

Nov 2025 – Jan 2026

React Native · Node.js · Express · MongoDB · Razorpay

- Architected a full-stack e-commerce mobile app end to end, following a layered backend pattern, mirroring production-grade Node.js API architecture.
- Built REST APIs for OTP-based auth, profile and address management, a product catalog with variants, pagination, location-based product discovery, cart, checkout, and order management/cancellation.
- Integrated Razorpay payments and implemented secure JWT-based single device authentication with server-side session validation, automatically invalidating prior sessions on new logins.

Chit Chat — End-to-End Encrypted Chat App [Download](#) | [GitHub](#)

Mar 2025 – Apr 2026

React Native · Firebase · WebRTC · Node.js

- Built a real-time, end-to-end encrypted one-to-one messaging app using public-private key cryptography, with WhatsApp-style delivery states (sent/delivered/read), local chat storage, and contact sync.
- Developed WebRTC-based real-time audio/video calling with call-state management (incoming, ongoing, busy) driven by push-notification signaling.
- Engineered a scalable chat architecture with optimized message indexing and reliable delivery across foreground, background, and terminated app states.

EXPERIENCE

Application Developer Intern

- Developed and shipped multiple React Native screens for a production talent-acquisition app, enabling users to create profiles, showcase talent, and discover opportunities in the entertainment industry.
- Implemented REST API integration and improved app responsiveness by cancelling unused requests during navigation, reducing network overhead and improving UX.

EDUCATION

BTech, Computer Science Engineering

Oct 2022 – June 2026

Gyan Ganga College of Technology, Jabalpur | CGPA: 7.53 / 10

ACHIEVEMENTS

- Awarded an 80% Tuition Fee Waiver (TFW Scholarship) — one of a limited number of merit-based seats offered annually institute-wide, earned via top entrance-exam percentile.
